

ABSTRACT OF THE DISCLOSURE

An apparatus (~~301, 314, 351~~) for cutting turf, for soil de-compacting and for soil drainage and irrigation. The apparatus (~~301, 314, 351~~) has a chassis (~~1~~) with a ground engaging means (~~5, 61~~), an adjustable working arm (~~3~~) having a chassis-engaging end (~~302~~) movably mounted on the chassis (~~1~~) and a tool-engaging end (~~303~~) having means for receiving a tool. The apparatus also has means for oscillating the tool-engaging end (~~303~~) of the adjustable working arm (~~3~~). The oscillating means comprises a drive means mounted on the chassis (~~1~~) and a connecting means mounted intermediate the drive means and the adjustable working arm (~~3~~).
